AMERICAN WELDING SOCIETY, 33 WEST 39TH STREET
NEW YORK, N. Y.

The Welding Journal

Index to Volume 20—1941

Published by the American Welding Society, 33 West 39th Street, New York, N. Y.

Part I—The Welding Journal

This part includes general technical articles, papers presented before Section and National meetings, news, biographical items, current welding literature, and advertising.

Page Allocation by Issues

January.....	1–80	July.....	413–492
February.....	81–148	August.....	493–572
March.....	149–212	September....	573–668
April.....	213–276	October.....	669–764
May.....	277–348	November....	765–828
June.....	349–412	December.....	829–892

Part II—Welding Research Supplement

This section includes the reports of the Welding Research Committee, critical digests of the literature, reports of the Fundamental Research Division and of the Industrial Research Division.

Page Allocation by Issues

January...	1-s-80-s	July.....	289-s-328-s
February..	81-s-120-s	August....	329-s-368-s
March....	121-s-160-s	September.	369-s-416-s
April.....	161-s-200-s	October....	417-s-512-s
May.....	201-s-248-s	November.	513-s-560-s
June.....	249-s-288-s	December..	561-s-608-s

PART I—THE WELDING JOURNAL

SUBJECT INDEX

Aircraft Spot Welding—L. M. Benkert, 305-306.
Aircraft Construction, Spot Welding—C. W. Steward, 21-22.
Aircraft Oxyacetylene Welding—H. Eckman, 180-185.
Aircraft Production Flash Welding—C. J. Hertel, 846-849.
Aircraft Resistance Welding Equipment—L. P. Wood, 775-780.
Aircraft Steels, Management Control of Design and Welding—J. P. Dods, 787-792.
Aircraft Structures, Tubular, Arc Welded—F. H. Stevenson, 466-470.
Aircraft Welding—E. C. Powers, 230-231.
Aircraft Welding Chrome-Molybdenum Tubing—F. R. Kostoch, 516-519.
Airplane Structures Welded for Impact Loading—N. F. Ward, 353-357.
Aluminum Alloys for Aircraft Spot Welded—L. M. Benkert, 305-306.
Aluminum Alloys, Spot Weldability of—C. L. Hibert, 497-504.
Aluminum Alloys, Spot Welding of—J. W. Dawson and B. L. Wise, 857-864.
Aluminum Plate Tubing—H. K. Schmuck, 864.
Arc Welding Trends—W. W. Reddie, 102-104.
Automotive Assemblies by Welding, 156-157.
Automotive—Cab Quality Controlled—A. Fintz, 313-314.
Automotive—Logging Trailer—Design for Welded Construction, 288-290.
Automotive Welding—S. M. Spice, Vaughan Fegley and L. M. Skidmore, 793-796.

Bell, Arc Welded, Repair—H. P. Rigsby, 513.
Brass to Steel—J. S. Graham, Jr., 783.
Brazing, Resistance—R. L. Briggs, 621-622.
Bridge, Design of a Welded—George T. Horton, 837-840.
Bridges—Shall We Weld?—F. L. Plummer, 281-287.
Bridge, Treasure Island—R. E. Spaulding, 322-323.
Bridge Welding, Cleveland—J. R. Morrill, 123-124.
Bronze Welding—Crusher Repair—H. A. Yost, 290.

Cement Kilns, Design and Construction of—Carl G. Malmberg, 226-229.
Clad-Nickel Steels—J. V. Kielb, 784-786.
Codes and Specifications—R. J. Love, 536-538.
Copper and Red Brass, Welding of—J. J. Vreeland and J. Babin, 219-225.
Cost Estimating Formulas for Arc Welding—J. V. Kielb, 19-21.
Conveyors, Arc Welded, 168-170.
Cutting, Bevel—B. H. Higgs, 786.
Cutting, Clamps for Stack—H. R. Gilson, 618-619.
Cutting Sprockets—J. M. Dulaney, 365.
Cutting, Stack—E. P. Jones, 179-180.
Cutting of Steel Mill Equipment—J. W. Stanley, 108-110.

Defense Production Speeded Up—E. C. Powers, 291.
Die Castings, Resistance Welding—R. T. Gillette, 10-11.

Fatigue Tests of Defective Welds, Belgian, 18.
Flame Cleaning of Structural Steel—F. H. Dill, 231-234.
Flame Cutting Machinery Parts—W. Roy Widdoes, 292-294.
Flame Grooving, Manual and Machine—E. V. David, 417-428.
Flame Hardening in Machine Tool Production—A. L. Hartley, 678-686.
Flame Machine Control—Discussion by J. J. Crowe, 185.
Flame Machining—G. L. Walker and W. G. Sylvester, 91-101.
Flash Welding Aircraft Parts—C. J. Hertel, 846-849.
Furnace, Portable Crucible—C. P. Philpot, 382-383.

Hard Facing Steel Equipment—F. L. Gray, 294-296.

Job Shop, Problems of—J. T. Lewis, Jr., 234-236.

Locomotive Construction—A. J. Raymo, 703-704.
Locomotive, Frames for Diesel—M. L. Smith, 535-536.

Machine Parts Welded, 836.
Machinery, Flame Cutting, Preparation for Welding—W. Roy Widdoes, 292-294.
Machinery—Metal-Working Press Arc Welded—A. F. Davis, 101-102.
Machines, Trenching—A. R. Askue, 171-172.
Metallurgy, Welding—O. H. Henry and G. E. Claussen, Vol. 2, Part I, 85-90; Part II, 173-179; Part III, 237-242; Part IV, 315-321; Part V, 374-381; Part VI, 432-439; Part VII, 520-526; Part VIII, 592-601.

Nickel Clad Steels—J. V. Kielb, 784-786.

Pipe Headers and Their Reinforcement—E. R. Seabloom, 577-586.
Pipe Welding Burlington Generating Station—Philip Salmon, 5-9.
Piping, High Pressure, High Temperature—F. C. Fantz, 505-513.
Piping, Investigation of Welding for Naval—Bela Ronay, 25-39.
Positioner Table, Welding—John S. Green, 439-440.
Preheating—Welding—Normalizing by Induction Hysteresis—C. J. Holslag, 105-107.
Pressure Vessel Codes, Discussion—J. G. Adair, 39-40.
Pressure Vessels—Rotary Dryers—C. E. Bill, 186-187.
Pressure Vessels, Tanks and Heat Exchangers—H. B. Schlosser, 865-869.
Production Welding—Kinks—George Sykes, 800-801.

Qualification Procedure, Standard—Committee Report, 448-465.
Qualification Requirements for Welding Operators—Discussion by A. F. Davis, D. S. Jacobus, C. E. Loos, H. C. Boardman, A. G. Bissell, C. H. Jennings, K. V. King, H. W. Pierce, V. P. Saxe, A. C. Weigel, 12-18.

Railroad Cars Spot Welded, 243–246.
Railroad Flat Car, Largest, Design of—H. M. Priest, 724–727.
Railroad Rails, Oxyacetylene Pressure Welding of—Lem Adams, 769–775.
Repair Casting for Shipyard Roller, 541.
Repair Excavating Equipment, 607.
Residual Shrinkage Stresses, Avoiding—Ralph E. Spaulding, 217–218.
Resistance Welding Equipment for Aircraft—L. P. Wood, 775–780.
Resistance Welding Loads—H. R. Crago, 797–799.
Resistance Welding Power Supply—AIEE Committee Report III, 366–373.
Resistance Welding Tube to Disk—H. S. Card, 247.
Resistance Welding Zinc-Alloy Die Castings—R. T. Gillette, 10–11.

Safety—Procedure in Welding or Cutting Certain Types of Containers Which Have Held Combustibles—Committee Report, 112–116.
Seam Welding—Practical Applications—E. A. Mallett, 602–607.
Shipbuilding—Discussion—E. B. Williams, 21.
Shipbuilding—Welded Galvanized and Corrosion Resisting Steel Smoke Pipes—H. O. Klinke, 693–697.
Ship Construction, Thermal Stresses and Shrinkage in—Committee Report, 587–591.
Ships, All-Welded—L. W. Delhi and M. N. Maltseff, 358–365.
Ship Welding—Cargo, All-Welded—A. C. Leigh, 158–163.
Ship Welding—Cupro-Nickel Cabin Cruiser—C. G. Miller, 429–431.
Ship Welding—Iron Towboat—J. M. Watts, 514–515.
Shrinkage Stresses, Residual, Avoidance of—Ralph E. Spaulding, 217–218.
Silver Alloy Brazing, Designs for—F. T. Van Syckel, 527–532.
Spot Welding Aluminum Alloy for Aircraft—L. M. Benkert, 305–306.
Spotweld, Electro-Magnetic Stirring Action in—A. M. Unger, H. A. Matis, W. A. Knocke, 42–47.
Spot Weldability of Aluminum Alloys—C. L. Hibert, 497–504.
Spot Welding Aluminum Alloys—J. W. Dawson and B. L. Wise, 857–864.
Spot Welding—Consistency Control Methods—A. M. Unger, 687–693.
Spot Welding—Control and Supervision—J. R. Fetcher, 673–677.
Spot Welding Electrode Materials—R.W.M.A., 90.
Spot Welding Electrodes, Thermal Gradients in—F. R. Hensel, E. I. Larsen, E. F. Holt, 850–856.
Spot Welding Galvanized and Corrosion Resisting Steel Smoke Pipes—H. O. Klinke, 693–697.
Spot Welding in Aircraft Construction—C. W. Steward, 21–22.
Spot Welding—Capacitive Stored Energy Systems—H. B. Axtell and R. L. Ringer, 117–122.
Spot Welding Passenger Cars—A. M. Unger, 243–246.
Stainless Alloy Steel Lining of Towers—R. L. Looney, 307–310.
Stainless Steel Gas Welded—H. H. Moss, 297–305.
Stainless Steel, Welding of—H. C. Esgar, 311–312.
Structural—Continuity in Steel—G. G. Landis, 620–621.
Structural—Design and Construction Methods—LaMotte Grover, 698–703.
Structural Frames, Welding in—Van Rensselaer P. Saxe, 163–168.
Structural—Gasoline Plant—A. F. Davis, 40–41.
Structural—Homes—A. F. Davis, 187–188.
Structural Welding—A. F. Davis, 539–541.
Structural Welding—Van Rensselaer P. Saxe, 705–710.
Structural Welding Design—C. H. Louree, 613–618.
Structural—Welding for Stiffness—G. G. Landis, 533–535.
Structural Steel, Welding of—C. R. Owens, 440–442.
Structural Welding—Government Buildings, New Zealand—R. G. Colvin, 443–447.
Structures, Design and Construction of—Discussion—T. R. Higgins and A. W. Carpenter, 22–24.

Tanks, Gas, Storage—A. F. Davis, 611–612.
Tanks, Storage, Natural Gas—J. O. Jackson, 833–835.
Thermal Stresses and Shrinkage in Welded Ship Construction—Committee Report, 587–591.
Training Arc Welding Operators—E. E. Isgren and W. J. Brooking, 153–156.
Training Brazing Instructors for National Defense—Leo Edelson, 710–716.
Training Gas Welders and Cutters—D. E. Roberts, 840–844.
Training Welders—Donald P. Masterson, 110–111.
Training of Welding Operators, Minimum Requirements—L. M. Dalcher, 781–783; Discussion by H. E. Lawrence, 844–845.
Training Welding Operators—T. B. Jefferson, 608–611.
Training Welding Operators—Code of Minimum Requirements for Instruction in—Committee Report, 623–643.
Tubing, Propeller Shaft, Severe Tests—H. S. Card, 381–382.

Weaving Technique, 845.
Wind Tunnel at Langley Field—A. F. Davis, 644.

X-ray Examination of Heavy Plate—O. R. Carpenter, 717–723; Discussion by A. J. Moses, 849.

AUTHOR INDEX

AIEE Committee on Electric Welding—Power Supply for Resistance-Welding Machines—III, 366–373.
Adair, J. G.—Discussion, "Codes for Welded Pressure Vessels," 39–40.
Adams, Lem.—Oxyacetylene Pressure Welding of Railroad Rails, 769–775.
American Welding Society—Codes:
Recommended Procedure to Be Followed in Preparing for Welding or Cutting Certain Types of Containers Which Have Held Combustibles, 112–116.
Standard Qualification Procedure, 448–465.
Report of Subcommittee on Thermal Stresses and Shrinkage in Welded Ship Construction, 587–591.
Proposed Code of Minimum Requirements for Instruction of Welding Operators, 623–643.

Welding Research Committee

PART II—WELDING RESEARCH SUPPLEMENT

SUBJECT INDEX

Aging Improves Ductility Gas Welds—J. R. Dawson and A. R. Lytle, 109–112.
Aircraft Tubes, Fatigue Tests of—F. Bollenrath and H. Cornelius, 159–160.
Steels, Cause of Welding Cracks—J. Müller, 309–316.
Spot Welding Research—Progress Report No. 1—W. F. Hess, R. A. Wyant and B. L. Averbach, 402–409.
Tubing, Residual Stress in—G. Sachs and C. H. Campbell, 553–558.
Aluminum and Its Alloys, Welding by Arc, Torch and Pressure Processes; A Review of the Literature—W. Spraragen and G. E. Claussen, 1–79.
Spot Welds in—L. Doussin, 79–80.
Surface Preparation for Spot Welding—E. von Rajakovics and E. Blohm, 95.
Flow in Brazing Aluminum—Mike A. Miller, 472–478.
Deoxidized Steel Welding—C. E. Sims and F. B. Dahle, 504–512.
Arc Blow, Magnetic—C. H. Jennings and A. B. White, 427–436.
Arc, Crater Formation in Various Atmospheres—G. E. Doan and R. E. Lorentz, Jr., 103–108; Discussion by H. G. MacPherson, 108; L. J. Larson, 166–167; Bela Ronay, 590.
Austenitic Welds, Dilution of—by Mild Steels and Low-Alloys—R. David Thomas and K. W. Ostrom, 185–189.

Bend Tests, Weldability—A Review of the Literature—W. Spraragen and G. E. Claussen, 369–401.
Boiler Code, German—R. Hessler, 108–109.
Brazed Joints in Steel, Tests of—F. C. Kelley, 96–102.
Brazing, The Flow of Metal in Brazing Aluminum—Mike A. Miller, 472–478.
Bridge Girders, Tests of Welded—Otto Graf, 138–148.
Bridge Welding in Yugoslavia—M. Roš, 169.

Cast Iron, Arc Welding—Lloyd Loughridge, 305.
Cast Iron Welding—German Standard, 94–95.
Chemistry of Arc Welding Process—D. Babcock, 189–197.
Chrome-Molybdenum Steel and Its Application to Piping—R. W. Emerson, 239–248; E. C. Rollason, 266–272; E. C. Rollason and A. H. Cottrell, 272–280.
Cooling, Effect of Delayed—A. H. Cottrell, K. Winterton and P. D. Crowther, 280–284.
Heat Flow in Arc Welding—E. M. Mahla, M. C. Rowland, C. A. Shook and G. E. Doan, 459–468.
Copper—A. P. Young, 513–521.
Base Alloy, Spot Welding of—M. L. Wood, J. Babin and O. B. Atkin, 149–159; Discussion by C. W. Steward, F. R. Hensel, E. I. Larsen and E. F. Holt, 182–184.

Fatigue, Effect of Rest on—F. Bollenrath, 113.
Tests of Welded Low-Alloy Steel—K. L. Zeyen, 120.
Tests of Welded Bridge Girders—Otto Graf, 138–148.
Tests of Welded Aircraft Tubes—F. Bollenrath and H. Cornelius, 159–160.
Tests of Welded Joints in Structural Steel Plates—W. M. Wilson, W. H. Bruckner, J. V. Coombe and R. A. Wilde, 352–357.
Fundamental Research Division and Problems, 249–265.

Gas Welds, Improving Ductility by Aging—J. R. Dawson and A. R. Lytle, 109–112.
Gold, Silver and Platinum—A Review of the Literature—W. Spraragen and G. E. Claussen, 121–135.

Hardness Related to Weldability—A Review of the Literature—W. Spraragen and G. E. Claussen, 561–590.
Heat Distribution During Welding and Cutting—D. Rosenthal, 220–234.
Flow, Effect on Properties of Steel—A. H. Cottrell, K. Winterton and P. D. Crowther, 280–284.
Flow in Arc Welding,—E. M. Mahla, M. C. Rowland, C. A. Shook and G. E. Doan, 459–468; Discussion by V. Paschkis, 608.
High Temperature Tensile Tests of Welded 18-8—O. H. Henry and Alfred L. Huber, 135–137.

Impact and Tensile Tests for Weldability—A Review of the Literature—W. Spraragen and G. E. Claussen, 522–552.
Inconel, Monel and Nickel, Spot Welding—W. F. Hess and Albert Muller, 417–426.
Inspection, Photographic Method—C. A. Dunn, 168–169.

Lead Welding—A Review of the Literature—W. Spraragen and G. E. Claussen, 81–92.
Low-Alloy Steels, Fatigue Tests of Welded—K. L. Zeyen, 120.
Low-Temperature Tests Arc-Welded Monel Metal—O. H. Henry and J. Babakian, 112–113.
Welding, Inclement Weather—John L. Miller and Ernest L. Koehler, 499–504.

Magnetic Tests for Determining Transformation Temperature—A. H. Cottrell, K. Winterton and P. D. Crowther, 280–284.
Micro-Fissuring in Multiple Bead Low-Carbon Steel Welds—John J. Miller and Lewis R. Kovac, 114–119; Discussion by E. W. P. Smith, 368.
Microstructure, Related to Appearance of Fracture—H. W. Sharp, 306–309.
Related to Hardness and Weldability—A Review of the Literature—W. Spraragen and G. E. Claussen, 561–590.
Molybdenum, Tantalum, Tungsten and Related Metals—A Review of the Literature—W. Spraragen and G. E. Claussen, 161–166.
Chrome Steel and Its Application to Piping—R. W. Emerson, 239–248; E. C. Rollason, 266–272; E. C. Rollason and A. H. Cottrell, 272–280.
Monel Metal Tests at Low-Temperatures—O. H. Henry and J. Babakian, 112–113.
Inconel and Nickel, Spot Welding—W. F. Hess and Albert Muller, 417–426.

Nickel Chrome-Molybdenum Steels, Thermal Characteristics—E. C. Rollason, 266–272; E. C. Rollason and A. H. Cottrell, 272–280.
Nickel, Monel and Inconel, Spot Welding—W. F. Hess and Albert Muller, 417–426.
Steels, Weldability of—C. E. Jackson and G. G. Luther, 437–452.

Paint Effect on Welding—A. L. Collin and R. P. Lowe, 348–351.
Piping, Chrome-Molybdenum Steel—R. W. Emerson, 239–248; E. C. Rollason, 266–272; E. C. Rollason and A. H. Cottrell, 272–280.
Platinum, Gold and Silver—A Review of the Literature—W. Spraragen and G. E. Claussen, 121–135.

Residual Stresses in Butt-Welded Steel Plates—George H. R. Griffiths, 410–414.
Stress in SAE X4130 Steel Tubing—G. Sachs and C. H. Campbell, 553–558.

Shrinkage Stresses in a Patch Weld—F. Stäblein, 80.
Stresses in Welded Bridge Girders—Otto Graf, 138–148.
Silver, Gold and Platinum—A Review of the Literature—W. Spraragen and G. E. Claussen, 121–135.

Slag Formed During Arc and Gas Welding—D. Rosenthal and D. Rozental, 92–94.
Spot Welding Light Metals, Surface Preparation for—E. von Rajakovics and E. Blohm, 95.
Electrodes, Changes of Shapes in—F. R. Hensel, E. I. Larsen and E. F. Holt, 119–120.
Copper Base Alloy—M. L. Wood, J. Babin and O. B. Atkin, 149–159; Discussion by C. W. Steward, F. R. Hensel, E. I. Larsen and E. F. Holt, 182–184.
Aircraft Research—Progress Report No. 1—W. F. Hess, R. A. Wyant and B. L. Averbach, 402–409.
Nickel, Monel and Inconel—W. F. Hess and Albert Muller, 417–426.
Surface Polish and Contact Resistance—W. B. Kouwenhoven and J. Tampico, 468–471.
Electrical Measurement of Electrode Pressure—W. F. Hess and L. Daniel Runkle, 491–498.
Spot Welding—R. F. Tylecote, 359–368; 591–602.
Spot Welds in 18-8 Aluminum Alloys—L. Doussin, 79–80.
Methods of Testing—R. E. Bowman, 478–482.
Stainless Steels, Spot Welds in—L. Doussin, 79–80.
High Temperature Tests—O. H. Henry and Alfred L. Huber, 135–137.
Stainless Weld Metal, Properties of—K. W. Ostrom and R. David Thomas, Jr., 317–323.
Stress Distribution Around Welded Joints—Joseph Garcia, 234–238.
Measurements in Weldments by X-rays—John T. Norton and Blake M. Loring, 284–287.
Distribution in Spot Welds—R. F. Tylecote, 359–368.
Concentration Factors in Main Members Due to Welded Stiffeners—W. R. Cherry, 603–608.
Stresses and Overstresses in Welded Structures—D. Rosenthal, 414–416.
Structural Girders with Inclined Stiffeners—Cyril D. Jensen, Charles M. Antoni and J. B. Reynolds, 170–182.
Design—J. F. Baker and J. W. Roderick, 558–560.

Tantalum, Tungsten, Molybdenum and Related Metals—A Review of the Literature—W. Spraragen and G. E. Claussen, 161–166.
Tungsten, Tantalum, Molybdenum and Related Metals, Welding of—A Review of the Literature—W. Spraragen and G. E. Claussen, 161–166.

Weldability-Base Metal Cracks—A Review of the Literature—W. Spraragen and G. E. Claussen, 201–219; Discussion by L. Reeve, 357–358.
Weld Metal Cracks—A Review of the Literature—W. Spraragen and G. E. Claussen, 289–305.
Cracks and Brittleness Under External Load—Part I—Types of Cracks and Definitions of Weldability—A Review of the Literature—W. Spraragen and G. E. Claussen, 329–347; Part II—Tests for Cracking Under External Load: Bend Tests, 369–401; Part III—Impact and Tensile Tests, 522–552; Part IV—Hardness and Microstructure, 561–590.
Weldability—Evaluating Welded Joints—Wendell F. Hess, 453–458.
Weldability High Tensile Steels—E. C. Rollason, 266–272; E. C. Rollason and A. H. Cottrell, 272–280.
Weldability of Steel—A. G. Ford, 287–288.
Specification of—A. B. Kinzel, 483–491.
Weldability Test (Bead) Applied to Alloy Steels—J. L. Cowhey, 198–200.
Carbon Steels—Almon W. Manlove, 324–328.
Nickel Steels—C. E. Jackson and G. G. Luther, 437–452.

X-rays, Stress Measurements in Weldments—John T. Norton and Blake M. Loring, 284–287.

1941 BOUND VOLUME

Bound Volumes of the JOURNAL of the Society for the year 1941 are now available with imitation black leather covers. Contains a wealth of information on the latest developments in welding. Also contains Subject and Authors' Index. Price, $5.00 plus postage to members; $6.50 to non-members.

SETS OF BOUND VOLUMES OF JOURNAL

In order to provide some of the new members of the Society with an opportunity to complete their library on Current Welding Literature, the AMERICAN WELDING SOCIETY is offering to these new members an opportunity to purchase the last nine bound volumes for the years 1933, 1934, 1935, 1936, 1937, 1938, 1939, 1940, and 1941 at $40.00 a set plus postage. The price to non-members for individual volumes is $6.50 and for the set $45.00 plus postage.
Each bound volume contains a Subject and Authors' Index and is bound in attractive imitation black leather covers. The set probably includes the most important welding information available in the literature.

THE WELDING JOURNAL

Published by American Welding Society

33 West 39th Street, New York, N. Y.

Available to Everyone at the Following Subscription Rates:
$5.00 per year — United States and possessions
$7.00 " " — Foreign Countries

Single Copy of Journal	$ .75
Except special numbers:	
October (Annual Meeting Number)	1.00
December (Year Book Number)	1.00
Extra Copies of All Issues to Members	.50
